Art instruction

Sculptor Aaron Fein (above) works with fifth-graders Friday at Baker-Butler Elementary School in Albemarle County.

Fein is helping the students at Baker-Butler create a sculpture for their school. The artist is showing the older students how to assemble the parts from raw materials, and the older students will then instruct the younger students, so the whole school can be involved in the process.

Fein expects to finish the project and install it at the school in April.

Fifth-grader Ahned El-Rifai (right) concentrates while assembling parts for the sculpture.
